BRAINPROTEK

腦 健 靈

Plus

- ✓ Help improve memory, cognition and thinking skills
- ✓ Help activate brain cells and inhibit cell oxidation
- ✓ Help Fight against brain fog and dementia
- ✓ Help promote blood circulation in the brain
- ✓ Benefit to kidney to nourish the brain

BrainProtekPlus is the best choice to boost your brain power!

May improve memory, cognition and thinking skills

Ginkgo biloba, known as the "herb of the brain", contains an active substance "Ginkgolide", which can increase blood circulation and blood flow to the brain.

Good blood circulation provide sufficient nutrients and oxygen to the brain which can promote dilate blood vessels, protect vascular endothelial tissue, that's make brain more effective.

Phosphatidylserine and phosphatidylcholine in brain Health are important substances in brain tissue and nerve cell, which help to synthesis of neurotransmitters. They play a key role in memory, learning and brain flexibility.

Help activate brain cells and inhibit cell oxidation

Ginkgo acts as a powerful antioxidant due to the presence of flavonoids. It helps to flight against brain cell damages and negative effects of free radicals. Also, total flavonoid glycosides contained in ginkgo can provide nutrients to the brain, help inhibit platelet activating factor (PAF), avoid thrombosis, thereby protecting the brain and central nervous system(CNS), and preventing brain degeneration and diseases.

Fight against brain fog and dementia

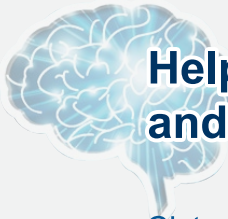

Brain fog, a neurological symptom. A survey from Northwestern University shows that 81% of coronavirus patients have experienced “long covid” symptoms such as “brain fog” after recovery¹. Oxford University also found that infection with COVID-19 causes brain shrinkage of 0.2% to 2%, brain tissue may also be damaged². The reducing of the gray matter in the brain processing emotions and memory, leading to memory loss, mental fatigue, lack of concentration and emotional distress. The Phosphatidylcholine (PC) and Phosphatidylserine (PS) in the BrainProtekPlus is the transmission of chemical messages in the brain, the important component of building nerve cell membranes, while increasing the fluidity of brain cell membranes and the concentration of glucose. It also has the function of repairing damaged cell membranes and promoting clarity of thought. Not only can improve learning performance, it can also improve the symptoms of cognitive impairment and Alzheimer's disease, and it can also fight against brain fog.

Helps nourish the kidneys and nourishes the brain

Cistanche Tubulosa is a rare and high-quality medicinal material in traditional Chinese medicine, and has the reputation of "desert Ginseng". The Chinese medicine reference book "Yellow Emperor's Canon of Internal Medicine" points out that "The lumbus is the house of the kidney, which governs bone and generates marrow, and so the brain is the sea of marrow.". Therefore, the Chinese medicine practitioner thinks that there is a close relationship between brain and kidney, which means there is a close relationship between memory loss and renal failure. Cistanche Tubulosa helps maintain good kidney function, improve memory, and prevent hypomnesia.

Ingredients are mild, suitable for all ages

The ingredients in BrainProtekPlus are all natural, additives free, and all plant ingredients are mild, also it is "homology of medicine and food", it is suitable for any age, even pregnant women.

BrainProtekPlus is the perfect combination of Chinese and Western functional medicine, whether it can maintain brain health, promote memory, fight off brain fog, prevent brain degeneration, BrainProtekPlus will be your best choice for brain supplementation!

The combination of Chinese and Western functional medicine “Super brain protect formula”

BrainPower Proprietary Formula - Ginkgo Biloba Extract and Ginkgo biloba L.

BrainPower Proprietary Formula - Ginkgo Biloba Extract and Ginkgo biloba L., comes from ginkgo tree, which is the one of the oldest tree in the world. Ginkgo has been used by Chinese for more than 5000 years for various ailments. It can also protect the brain and central nervous system to prevent brain degeneration. Ginkgo Biloba Extract has the effect of activating blood circulation and removing blood stasis, regulating blood vessel tension and elasticity, increasing brain blood flow and promoting blood circulation. Ginkgo biloba L. contains total ginkgo flavonoids, which provide nutrients for the brain. It also inhibits platelet activating factor (PAF), inhibits platelet aggregation and prevents thrombosis.

Cistanche Tubulosa Extract

Cistanche Tubulosa Extract, it grows in dry areas and it is an endangered species. It is hard to obtain and is also known as “Desert Ginseng”. It can improve brain memory, prevent memory degradation. Promote the regeneration of nerve cells to improve the memory and learning ability of patients with dementia and Alzheimer’s disease.

The combination of Chinese and Western functional medicine “Super brain protect formula”

Phosphatidylserine

Phosphatidylserine helps to increase resistance to free radical damage, achieving intensive antioxidant capacity, making the brain more nimble, enhancing clear thinking, improving learning performance, as well as improving symptoms of ADHD*, cognitive impairment and Alzheimer's disease.

*Take it with GUT MABO to get a better result!

Phosphatidylcholine

Phosphatidylcholine produces a brain chemical called acetylcholine, which participates in memory and other bodily functions. It can improve learning performance, activate nerve cell activity, and quickly transmit the instructions of the brain. The increase of acetylcholine can help fight against brain fog, improve slow thinking, cognitive dysfunction and Alzheimer's disease and other symptoms.

Caution: Choline is found mostly in meat and organ meat, the body needs a large amount of choline to convert into phosphatidylcholine (PC). Therefore, the daily serving of BrainProtekPlus is already sufficient for the basic supplementation in order to lower diseases related to the brain.
