His family received a call from the hospital about Mr. Lo fainted after the stroke and they were very worried. Unfortunately he was infected with pneumonia afterward, this worsened his situation, and he had been into a coma for nearly a month; therefore they consulted Dr Jawid Khan immediately. Dr Jawid carefully explained Mr. Lo's conditions, and suggested that he should take products. However, Mr. Lo was under coma and was inserted with air hose, so he was not able to eat.

While under coma, everyday he could only use nutritional fluid to maintain his life, therefore he was getting skinnier every single day, and his whole family was all very concerned.

中風康復噴霧（腦部蛛網膜血管瘤爆裂後遺症）

二零一四年十二月，盧先生在乘搭巴士期間突然暈倒，巴士司機及其他乘客立即報警，之後就一直昏迷。其家人收到醫院通知盧先生中風暈倒入院後，憂心忡忡，之後又不幸感染肺炎，情況嚴重，昏迷接近一個月，於是立即請教簡志偉博士，簡博士細心解釋了盧先生的狀況，並謂盧先生需要進食產品，但可惜盧先生仍然在昏迷期間，而且插入氣喉，不能飲食。

昏迷期間，他每天只能靠吊營養液維持生命，所以身體一日一日逐漸地消瘦，全家人都十分擔心……

信譽產品 / 重拾健康

香港每日平均有 74 人會患中風，當中大約有三成人能回復自理能力，但回復自理能力後，亦會在機能上出現障礙。

In Hong Kong on average 74 people will suffer from stroke every day. Within those people, around 30% of them can recover their self-care skills. However, even if they recovered their self-care skills; they may still experience obstacles in their body functions.

Upon that, Mr. Lo's family had to grind Pycnophy into powder, and added with TummyPal, Pre-Biotic Concentrate, ATPower and Aloe Vera Concentrate, and sprayed the mixture using a sprayer into Mr. Lo's mouth, hoped that he could absorb.

於是，盧先生的家人將疲樂振磨碎，再加入益億菌、益菌活能寶、細胞活能寶和濃縮蘆薈汁，磨碎混合後再用噴霧器，嘗試噴入盧先生口中，希望他可以吸收。

About a month later, Mr. Lo had finally woken up, and started to eat some paste form foods. Each day his family would feed him with mixture of Pycnophy, TummyPal, Pre-Biotic Concentrate, CitrusC, LiverProtex, ProtexU and Aloe Vera Concentrate with water. While his doctor wanted to help him with his breathing, a stoma was made on his throat. With a cut he was not allowed to move, as that might affect the healing process of the location of the breathing tube and wound is moved. Therefore his family used Aloe Gelly Concentrate, and his wound healed very fast, so the stoma can also be removed.

大概一個月後，盧先生終於甦醒，可以開始嘗試進食糊狀食物。他的家人每天以疲樂振、益億菌、細胞活能寶、C 集、活肝寶、護體健及濃縮蘆薈汁混合水給他食用。而醫生為了幫助他呼吸，所以在喉嚨上做了一個造口，所以傷口不可以動，若影響了喉管的位置，傷口則不能癒合。於是他的家人使用了濃縮蘆薈清涼膏，他的傷口癒合情況良好，終於可以移除造口。

之後，盧先生的家人再增加 NU LIFE 功能性濃縮食品的份量，加快其康復的進度，連醫生對他良好的康復進度，都覺得非常詫異，最後大約兩個月左右終於可以出院。

After discharged, Mr. Lo's memory, cognition, language skills, limbs movement, urination and bowel movement were not affected. He can even work out and go onto holiday in Japan with his family. Recalled that the doctor had said that 6 out of 10 patients were not able to make it before arrival to the hospital, and even some patients who arrived in hospital might still have lots of implications, Mr. Lo is very grateful for this peaceful discharged. Mr. Lo appreciated the helps from NU LIFE's Functional Food Concentrate, his wife and his kids took good care of him, as well as Dr Jawid Khan.

出院後，盧先生的記憶力、認知力、語言能力、四肢活動能力及大小便均沒有影響，更可以做健身，與家人一齊去了日本旅行。回想醫生當初說十個病人中有六個未能趕及到醫院便已經死亡，有些病人即使到醫院之後也有很多併發症，甚至日後要轉介到老人院長期接受照顧，所以盧先生今次沒事出院真的很感恩。盧先生非常感謝 NU LIFE 功能性濃縮食品的幫助，多謝太太及子女悉心的照顧，感謝簡志偉博士。
